<u>Outdoor Classroom/Swing –</u> Update – "I have reviewed information provided for the proposed outdoor classroom project. Based on the method of construction - wood columns, concrete foundation and modified grain bin for remaining structure - this falls under an "unusual structure" in the building code. This means it is required to be designed by an engineer (structure and foundation).

I understand that this may add to the cost however, under current legislation this is required, especially considering this will be used by children.

Miles Hutchings Class 3 Building Official"

-Our status at the moment is GSSD Facilities is trying to get an Engineer to take this on.

-Our 50/50 Fundraiser is going well, a winner will be announced on Friday after the raffle closes – closes at 10am.
